PROFESSIONAL SUMMARY

Business Analyst and Data Analyst with proven experience applying business intelligence, cloud computing, and automation to deliver measurable results. Proficient in SQL, Power BI, Python, R, and Advanced Excel. Track record of driving revenue growth, improving workflows, and raising quality through cross-functional collaboration and technical execution.

EXPERIENCE

Business Analyst Intern

March 2026 – August 2026

Intrastack Solutions

Orlando, FL

- Documented business requirements, workflows, reporting solutions, user stories, and user acceptance criteria in Jira across Agile/Scrum sprints for 5+ concurrent client projects, helping cross-functional teams execute platform and technology work accurately.
- Led cloud-based project teams using AWS, Azure, and GCP from initiation to closure, managing requirements gathering, sprint planning, and stakeholder coordination; improving team workflows by 70-80%.
- Queried company relational databases with SQL to analyze ongoing cloud projects, co-worker assignments, and resource utilization.
- Supported quality assurance (UAT) by validating system outputs and identifying defects before release, improving project deliverable quality by 80%.
- Developed and maintained Power BI dashboards tracking project KPIs for operational, departmental, and executive-level reporting.
- Co-designed and implemented scalable automation workflows using Large Language Models (LLMs) to eliminate routine operational and administrative tasks, improving team productivity and operational efficiency by 70%.

Sales Analytics Consultant

May 2025 – August 2025

Furnt

Harare, Zimbabwe

- Cleaned, validated, and organized raw sales data in Advanced Excel; built Power BI dashboards with KPI reporting that helped leadership prioritize highest-margin products and optimize customer segmentation.
- Contributed to a 50% revenue increase by delivering data-driven insights and recommendations that guided sales strategy and customer segmentation decisions for technical and non-technical stakeholders.
- Wrote and optimized SQL queries to extract, validate, and reconcile customer data, improving reporting and analysis accuracy by 60%.

Business Intern

January 2023 – September 2023

ZBMS

Harare, Zimbabwe

- Conducted market research and competitor analysis that guided management decisions for a digital advertising campaign, increasing customer engagement by 70%.
- Developed Power BI dashboards to visualize customer engagement data across digital platforms, reducing reporting time by 50% and helping stakeholders generate insights faster.
- Analyzed customer purchase trends and product performance using Excel pivot tables, charts, and KPIs; identified demand patterns that improved targeted sales planning by 30%.
